DENTSPLY Implants is committed to new and innovative knowledge, however sponsorship by DENTSPLY Implants does not necessarily imply endorsement of a particular philosophy, procedure, or product.

ADA C.E.R.P.® | Continuing Education Recognition Program

DENTSPLY is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. DENTSPLY designates this activity for 3 continuing education credits.

Why you should attend

Today more than ever, the entire dental team needs to understand the options patients have concerning dental implants. Patients are more informed now than ever before, and require excellent results. Today's implant clinicians need to be fully confident in what options are available to patients, from single to multiple implant restorations. This program will discuss systems that can be implemented immediately to help properly plan and present implant options to patients. It will discuss how to handle questions patients have by phone to questions your patients have before, during, and after treatment. Surgical and restorative considerations, such as immediate occlusal load and extraction immediate placement, will be addressed, as well as a discussion in implant technologies, in order to achieve the results your patients deserve.

Learning Objectives

- Train your entire dental team to prepare for dental implant restorations
- Present implant options to patients that turn "No" into "Yes!"
- Perform needs analysis (Fixed vs. Removable)
- Determine when to immediately load patients
- Make surgical guides and CT scans work for you
- Incorporate a dental lab into your Team
- Understand new lab technology that is moving faster than ever

Speakers

Dr. Wesley Mullins: Dr. Mullins attained his bachelor's degree from West Virginia University, and then went on to earn his dental degree from the West Virginia University School of Dentistry. Committed to lifetime learning in the dental field, Dr. Mullins completed his general practice residency at the University of Tennessee Medical Center. His concentration on advanced laser dentistry, state of the art dentistry, oral surgery, implant dentistry, and the management of medically compromised patients allow him to provide his patients with the best options for improving a smile that dentistry has to offer. Dr. Mullins currently practices in a solo practice in Powell, TN and is an instructor at the University of Tennessee Medical Center in Knoxville.

Dr. Jason R. Kennedy, DMD: Jason Kennedy, DMD, received his dental degree from the University of Louisville Dental School in Louisville, Kentucky and did his residency at the University of Tennessee Medical Center, Department of Oral and Maxillofacial Surgery, in Knoxville, Tennessee. He is a Diplomate of the Board of Oral and Maxillofacial Surgery and in private practice with Southeast Oral Surgery in Maryville, Tennessee.

His professional interests include oral rehabilitation with dental implants, maxillofacial trauma, and head and neck pathology. When not working, he can be found spending time with family, traveling, watching and playing baseball, and participating in mission work.
